

CONTROL BOX KIT

**INFINITY**

Your overflow pool can finally be secured

# CONTROL BOX KIT INFINITY

Are you planning to build or renovate an infinity pool? We now offer you the option of fitting your pool with an automatic cover without compromising on safety. Thanks to the CF Infinity control box kit, you can enjoy the many benefits of your cover with complete peace of mind: water savings, UV protection, protection from dirt, less maintenance...

## + products

Technology developed by our Research & Development teams.

Enables slatted automatic covers to comply to NF P90-308 standard\*.

Automatic water level control.

Can be installed on mirror pools.

\* On the condition that the required locker systems are set up manually.

## Kit contents

- A) 1 control box
- B) 5 level control sensors
- C) 2 check valves
- D) 1 automatic valve
- E) 1 transparent PVC pipe

## SAFETY FIRST

- Developed and designed by our specialists, this kit allows the cover to meet the French safety standard (NF P90-308\*).
- A compliance certificate will be issued for your pool.
- Reduces the risks of accidents and/or increases the wind resistance of your cover.

## A SMART KIT

- The control box automatically regulates the overflow when opening and closing the cover.
- Regulation of the water level as a closed circuit (Secured Level Control technology).

## EASY OPERATION

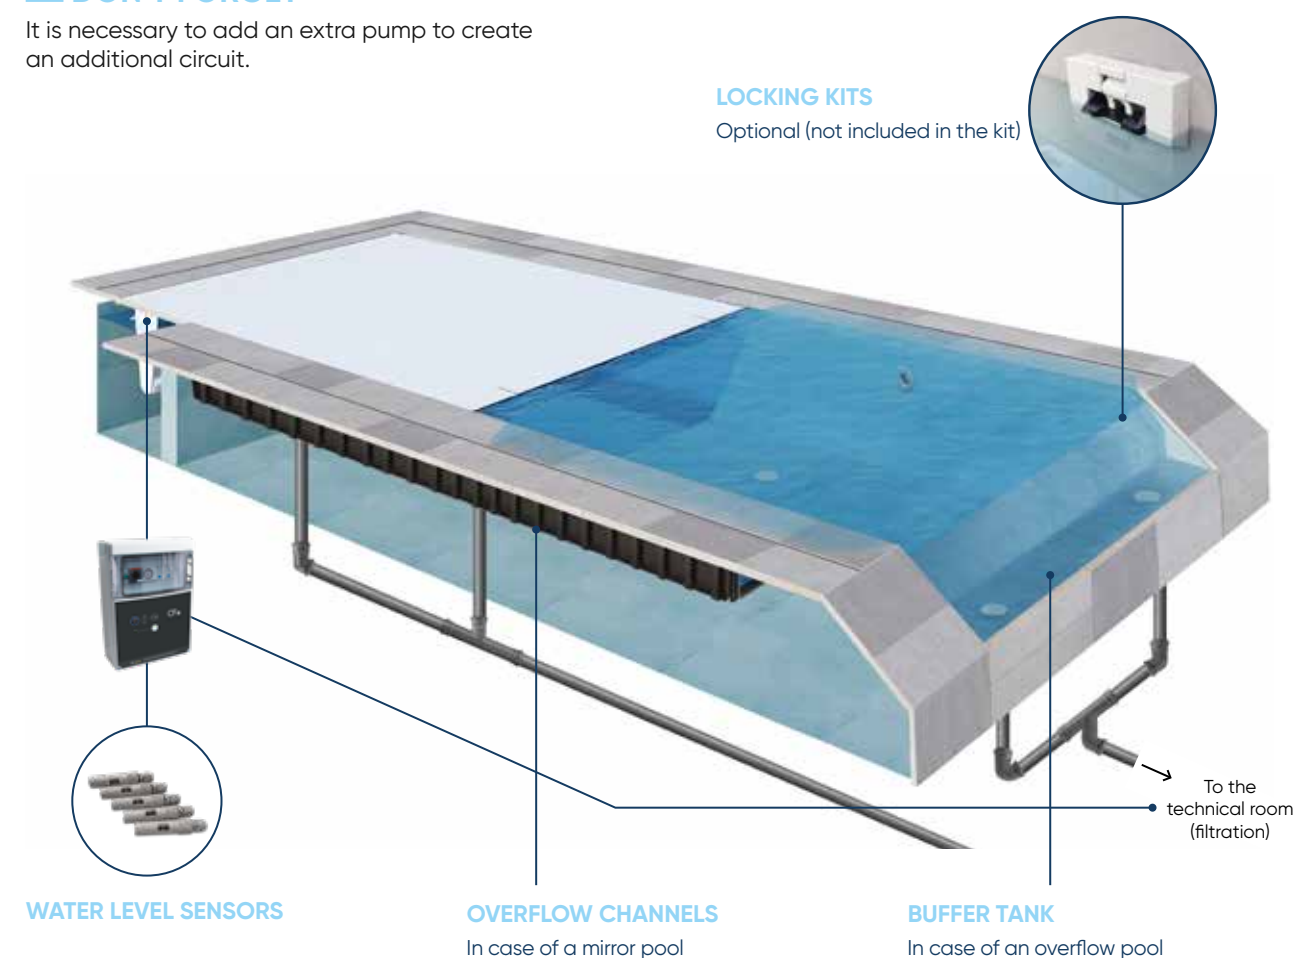

When closing the cover, the Infinity system stops the overflow and lowers the water level in the pool by storing this volume of water in the buffer tank.

It allows you to safely lock the cover and prevents it from sliding over the surface of the overflow. Filtration is still maintained under the closed cover. Once you re-open the cover, the Infinity system takes the water back from the buffer tank and re-injects it into the pool to re-start the overflow.

\* In compliance with the NF P90-308 French safety standard provided the safety locking kits are manually set up.

## DON'T FORGET

It is necessary to add an extra pump to create an additional circuit.

## The cover: a plus on an infinity pool too!

- Prevents heat loss and water evaporation.
- Reduces the need for chemical treatments, by blocking out UV rays that encourage algae growth.
- Protects against debris and dirt from the pool's landscaped environment, and reduces maintenance.

### DEL covers that are compatible with this kit:

Tixit\*

Moon\*

Contura\*

Rollover\*

Rolleasy 2\*

Rollinside

Rollin

Rollenergy Evolution

\* Covers with electrical power supply only. For covers with 12 V power supply: please contact us.

### Hydraulic plan

Scan this QR Code to see the hydraulic plan.

### Mirror pools

The kit also enables to secure the slatted cover on mirror pools.

#### Read carefully and keep for future reference.

The Infinity control box kit allows the automatic cover, declared compatible by its manufacturer, to be compliant with the NF P90-308 standard. The automatic cover is a safety device designed to keep children under the age of 5 out of the pool. It is not a substitute for common sense or personal responsibility. It is not a substitute for the vigilance of parents and/or responsible adults, which remains the essential factor for the safety of young children. A child can drown in less than 3 minutes; no type of preventive measures can replace the monitoring and vigilance of a responsible adult.
