## SLATS

# SLATS 69 MM

### + FINISH

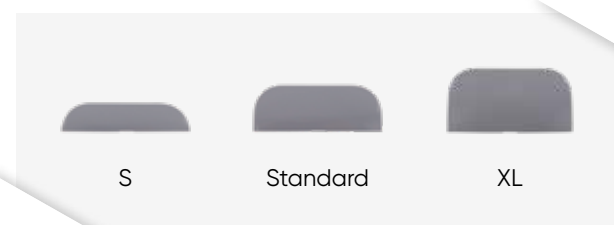

- The slats' profile and the weld-free appearance of the end-caps make the slats very aesthetic.

### + MATERIAL

- 69 mm slats without lead additives and with a calcium zinc-based formula.
- The slats are UV-treated and have a good resistance to stains and organic deposits.
- Material compliant with age resistance requirements defined by NF T-54-405-1: 2002 standard.

### + END-CAPS

- Factory assembled, the standard size is 2.50 cm. If the slats need to be adjusted during the installation, smaller end-caps size S (-1 cm) and bigger end-caps size XL (+1 cm) are also available.
- For a more optimal and qualitative appearance of your slats, our radius-end caps can be adjusted to the radius of your pool or staircase.

## OPAQUE PVC SLATS

### + THE SLATS THAT MAKE YOUR POOL SAFE WITH SIMPLICITY

An accessible range of slats adaptable to all types of pools.

### Your colour choice

All our slats have a quality finish and are compliant with the NF P90-308 standard.

White

Beige

Grey

Blue

## SOLAR POLYCARBONATE SLATS

### + THE SLATS THAT BOTH HEAT YOUR POOL AND MAKE IT SAFE

They are very resistant to hail. Remain perfectly watertight and functional after hailstones of about 4 to 5 cm have fallen.

### Your colour choice

All our slats have a quality finish and are compliant with the NF P90-308 standard.

Absolute black

Crystal black

Silver

Crystal blue

Crystal

Crystal brown

Crystal green

### Don't forget

The locking kits of your slats ensure the safety of your pool.

#### Read carefully and keep for future reference.

The slats are parts of the slatted cover designed to prevent children under 5 years of age from accessing the pool. This product complies with the NF P90-308 standard. It is no substitute for common sense or individual responsibility. It is not intended either to be a substitute for parental and/or adult supervision, which is the essential factor for the protection of young children. A child can get drowned within less than 3 minutes; no type of protection will ever replace the vigilance and supervision of responsible adults.

**Warranty:** 3 years for opaque PVC slats and 5 years for solar polycarbonate slats, in accordance with our general sales terms.

**Order form:** to have slats correctly adjusted to the pool, it is essential to provide a drawing of the pool with measurements taken every 1 meter. In accordance with the NF P90-308 standard, the gap between the inside of the pool and the edge of the cover must be less than 70 mm.

**Use:** for all seasons. For a proper functioning, maintain a constant water level corresponding to a normal filtration of the pool. It is essential to have a water level regulator. The water level has to comply with the technical notice. Solar polycarbonate slats are incompatible with bromine treatments.

**Use limits:** DEL automatic slatted covers on overflowing pools can only be compliant if the pool is fitted with a device such as the Infinity control box that automatically lowers the water level by at least 2 cm when the cover is closed on the pool. To date, DEL automatic slatted covers with a removable form on a side staircase do not comply with French standard NF P90-308. Unless otherwise specified by the manufacturer, immersion alarms are not are not compatible with DEL automatic slatted covers.

**Wintering:** the swimming pool must be wintered on the basis of its geographical location. Without lowering the water level, close the cover to its safety position and where applicable install a wintering net to protect the cover. If the water level is lowered so that the wall units are above the waterline, roll the cover in and secure the pool using a winter safety cover.

**Packing list:** for a swimming pool measuring 5.00 x 10.00 m. Slats: 5 packages: 5.10 x 0.25 x 0.20 m - 250 kg.
