FILTRATION PUMP CF WATERCOOLED VS

Premium watercooled filtration pump

+ products

Silent performance

- Patented water-cooled motor: no fan, less noise.
- Increased energy efficiency: transfers heat from the motor to the water, eliminating fan-related losses and improving heat pump efficiency.

Durable

- Corrosion- and UV-resistant polypropylene housing.
- A single passivated stainless steel screw on the back of the motor: suitable for marine environments.
- Extra-large basket (4.5L): fewer maintenance operations.

Simple and connected

- Simple and intuitive control: easy-to-use speed selector with 10 speeds and a backwash mode.
- Remote control and programming via Bluetooth app.

AND ALSO

Power cable: 3 meters

Compatible with salt treatment: 6 g/L

Waterproof RJ45 communication port for connecting an external controller, a cover, or a heat pump
