

DEBRIS WINTER COVER
SUPERGREEN

SAFETY

A highly resistant cover

DEBRIS WINTER COVER SUPERGREEN

+ ROBUSTNESS

- Ideal cover for large sized pools.
- Polyethylene 235 g/m² mesh stabilised against solar UVs which ensure an excellent tear-resistance (weave 2100 N/5 cm and weft 2300 N/5 cm).
- Very fine and tight weave (89% opacity) to limit photosynthesis and the growth of algae during winter.
- Different types of anchors and tensions for integration in all environments.

+ DURABILITY

- Three-needle stitched straps and PVC reinforcements under each strap limit abrasion against the coping.
- The cover has a perimeter strap and a grid along the lengths and widths (a maximum spacing of 1 m between each strap for safety covers) to ensure the fit.

COLOUR AVAILABLE

Green

USEFUL TO KNOW

- Safety cover available for a pool up to 6.00 x 13.00 m.
- Non-safety cover available for a pool up to 12.50 x 25.00 m (mandatory supporting wires for widths from 6.00 m).
