

CFBlock X | POLYSTYRENE STRUCTURE

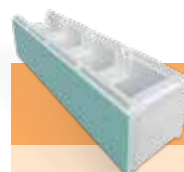

- + Large-sized: quicker installation and less rebar
- + Very high density on pool side: 80 kg/m³
- + Ultra light
- + More thermal insulation than concrete blocks

125 l x 25 d x 37.5 h cm

FEATURES

- Pool side: 80 kg/m³ that help prevent markings on the pool walls.
- Outer side: 25 kg/m³.
- Dimensions: 125 l x 25 d x 37.5 h cm (longer and taller than standard concrete blocks).
- Concrete fill: 132 L/m².
- ~~Recommended concrete: C20/25 XC2.~~
- Thermal conductivity: 0.032 - 0.034 W/m.K.
- Easily cuttable with a handsaw, sabre saw, or styrofoam-cutter.
- Concrete filling in 3 consecutive fills for a more equal fill.
- ~~Flat or "U"~~-shaped aluminium liner-lock profile to install before hanging the liner.
- Other available accessory: the reversible liner-lock corner kit (outside/inside corner) enables perfect and easy liner installation around the pool.
