CF AUTOMATIC FILTRATION VALVE

Intelligent and intuitive filtration management for greater savings and peace of mind.

+ PRODUCT

INSTALLATION DIAGRAM

For sand filters with side valve

Use fitting kits to easily install the valve on the filter.

Automated filtration:

- 2 automatic backwash programming modes: by pressure sensor or by timer.
- Economical: reduces water consumption during sand filter backwashes.

Intelligent:

- Controls the start and stop of the filtration pump when changing the valve position.
- Safe thanks to the integrated battery, which provides an auto-safety function in the event of a power cut during backwashing.
- Can control filtration pumps equipped with pilot wires via dry contact output.

Simple and practical:

- Intuitive touchscreen.
- Remotely controllable and programmable.
- Manual backwash possible and easy to perform with a single press of a dedicated button.

AND ALSO

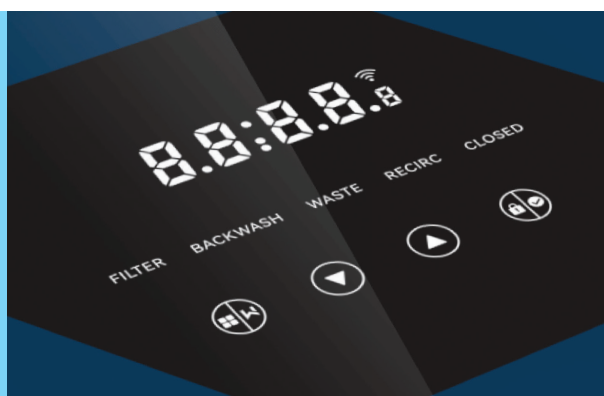

Backwash flow rate: 24 m³/h.

Compatible with salt treatment: 3.5 g/L.

6-way valve included - suitable fitting kit required depending on your filter.

CONNECTED

Control the CF automatic valve via its intuitive touchscreen for precise use, or via the dedicated iGarden app (WiFi).
